

BBF TAILORED PRODUCTS & SERVICES

To some extent, every business is depending on their existing IT systems and applications. In an ever changing competitive market, new demands arise for these systems constantly and adjusting to these situations can be a challenging task. Tailored software products and services offer a sensible solution for your needs, as they are highly adaptable to your individual case.

Our approach to designing software solutions is based on the belief that the eventual application has to be able to handle delicate business operations precisely, efficiently and user friendly. Especially for professionals in the financial service industry, tailored products are absolutely essential in order to fulfil each client's specific needs.

Our past projects in this field included:

- Economic Calendar that uses various data providers to keep track of current economic events
- Analytics Tool to quickly analyse the measured impact of economic indicators on the Forex market under varying market situations
- Trade Engine to reliably communicate with various Forex matching platforms, including both a web and desktop based solution in order to maximise the fields of application
- Charting Tool to aggregate economic indicators in groups that help keep track of the state of economies at large
- Automated Trading Software solution that allows users to design trading signals based on a bundle of indicators
- Monitoring Tool to support non IT specialists to quickly identify the operational status of their systems and helps communicate exceptions timely and accurately
- design a low latency Trading Setup including all aspects of the network and its connectivity to multiple matching platforms
- Money Management Tool to monitor and allocate exposure to FX Spot transactions depending on the users predefined strategies
- Various applications and tools to improve workflows in both Front and Back Office of investment banking organisations

If you are interested in a free consultation and are considering starting, modifying or scaling the software your business is using, then please do contact us at office@bbf-it.com
